Introduction

In 2014 Missouri legislators passed House Bill 1490, mandating the development of the Missouri Learning Expectations. In April of 2016, these Missouri Learning Expectations were adopted by the State Board of Education. Groups of Missouri educators from across the state collaborated to create the documents necessary to support the implementation of these expectations.

One of the documents developed is the item specification document, which includes all Missouri grade level/course expectations arranged by domains/strands. It defines what could be measured on a variety of assessments. The document serves as the foundation of the assessment development process.

Although teachers may use this document to provide clarity to the expectations, these specifications are intended for summative, benchmark, and large-scale assessment purposes.

Components of the item specifications include:

Expectation Unwrapped breaks down a list of clearly delineated content and skills the students are expected to know and be able to do upon mastery of the Expectation.

Depth of Knowledge (DOK) Ceiling indicates the highest level of cognitive complexity that would typically be assessed on a large scale assessment. The DOK ceiling is not intended to limit the complexity one might reach in classroom instruction.

Item Format indicates the types of items used in large scale assessment. For each expectation, the item format specifies the type best suited for that particular expectation.

Possible Item Format in ELA	Definition
Technology Enhanced - Drag and Drop	Click and drag an object to the appropriate location in the response area.
Technology Enhanced - Drop-down Menu	Select an answer from a drop-down menu.
Evidence-Based Selected-Response (EBSR), multi-part items	This item type has two parts. Each part may consist of one of three item types: Multiple Choice, Multi-select, and Hot Text. See those item types for descriptions of how to respond.
Technology Enhanced - Hot Spot/Text Highlight	Highlight an option by selecting it. Select one or more options.
Multiple Choice	Select the radio button corresponding to one of four options. Select only one option.
Multiple Select	Mark a radio button corresponding to an option. Mark more than one option. Item will provide number to select.
Writing Prompt	Respond via keyboard entry using text-formatting buttons.

Text Types suggests a broad list of text types for both literary and informational expectations. This list is not intended to be all inclusive: other text types may be used in the classroom setting. The expectations were written in grade level bands; for this reason, the progression of the expectations relies upon increasing levels of quantitative and qualitative text complexities.

Content Limits/Assessment Boundaries are parameters that item writers should consider when developing a large scale assessment. For example, some expectations should not be assessed on a large scale assessment but are better suited for local assessment.

Sample stems are examples that address the specific elements of each expectation and address varying DOK levels. The sample stems provided in this document are in no way intended to limit the depth and breadth of possible item stems. The expectation should be assessed in a variety of ways.

Reading Literary Text		8.RL.1.A
1 A MLS	Comprehend and Interpret Texts (Approaching Texts as a Reader) Evidence/Inference Draw conclusions, infer, and analyze by citing the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.	
<u>Expectation Unwrapped</u> The student will draw conclusions by citing textual evidence that most strongly supports an analysis of what the text says explicitly. The student will make inferences by citing textual evidence that most strongly supports an analysis of what the text says explicitly. The student will cite textual evidence that most strongly supports what the text says explicitly as well as inferences drawn from the text.		<u>DOK Ceiling</u> 3
		<u>Item Format</u> Selected Response Technology Enhanced
		<u>Text Types</u> Literary: e.g., poetry, drama, realistic fiction, historical fiction, folktale, legend, science fiction. Text complexity will increase both qualitatively and quantitatively through the grade levels.
<u>Content Limits/Assessment Boundaries</u> Inferences must be based on text and not require prior knowledge of content.		<u>Sample Stems</u> It can be inferred from the phrase "QUOTE" that _____. Which sentence best supports the inference that _____? What conclusion can be drawn from _____?
